

Report Usage Analysis

OLM report experts will work with you to:

- Create a catalogue of existing reports
- Assess the usage levels of existing reports
- Identify equivalent CareReports product options
- Recommend potential report amalgamation
- Perform GAP analysis of CareReports against your requirements

How Can Report Usage Analysis Help You?

- The production of a reports catalogue will give you the ability to identify gaps in your reporting requirements and enable you to determine the best way forward for producing the reports not covered by CareReports or your local reports
- Avoid confusion and achieve a streamlined suite of reports by removing duplicates and obsolete reports
- Increase efficiency by ensuring all your reporting requirements are catered for, avoiding the need for staff to create bespoke reports each time they are required
